

## Our Promise

We promise not to waste your kind donations on administrative costs.

Unlike many larger charities, we are able to make this promise because we have no administrative offices and no paid administrative staff. All staff involved in the administration of HEAL are volunteers.

So, with very small administrative costs, much more of your money actually goes to providing shelter, support, education and health care for needy children.

HEAL is a registered charity, so there are significant tax advantages arising from personal and corporate donations in both the UK and the USA.

# heal

health and education for all

Providing:

- Homes
  - Food
  - Education
  - Health Care
- for orphans and underprivileged children in India

## What we do

HEAL, a UK-based charity formed in 1992, lifts hundreds of orphans and needy children in Andhra Pradesh (India) out of the poverty trap and provides them with housing, medical care, food and education. HEAL transforms their lives and gives them opportunities and skills for a better future.

## What we have achieved so far:

### HEAL Children's Village, Guntur

Two hundred children of all ages are housed, fed, schooled and cared for in a purpose-built centre in beautiful surroundings outside the city.

### Makineni Health Centre, Guntur

Health care is provided for the children's village and for the children of local farmers and quarry-labourers.

### Ankita Children's Home, Guntur

HEAL provides free housing for teenagers in further education.

### Bhadrachalam School

HEAL provides school fees, uniforms, books and lunches at this remote rural school for 300 of the most needy children in an area of much illiteracy.

### ASNRAZP School, Vijayawada

HEAL supports this city school for 350 underprivileged children in a deprived area. Many of the children cannot even afford a pair of sandals.

## Our latest project

HEAL's latest and most ambitious project is to build a village and school to care for and educate 1,000 orphans and the poorest children from anywhere in India.

A 25-acre site has been acquired and cleared and is ready for construction.

### The Village will...

- Create a safe haven where 1,000 needy children can be nurtured and realise their full potential;
- Create a self-sustaining and mutually beneficial community based on the pursuit of happiness through the common good;
- Use the best available methods to minimise resource usage and to reduce and recycle waste.

The village will lead the way in construction using recycled waste materials and in the use of 'green' technologies for electricity, water, sewage and the growing of organic vegetables.

### The village will contain:

- School buildings
- Housing for the children and their carers
- A health centre
- Sports and arts facilities
- Accommodation for visiting volunteers
- Vegetable growing areas
- A care home for the elderly
- Buildings available for community use
- An institute for the blind

## How you can help with this new project

### Sponsor a building or a classroom

We now need funds for each building. If you wish, you can have a building or a room named after you, your company or a loved one. Please see our website for details - [www.heal.co.uk](http://www.heal.co.uk)

### Make a donation

Either a single contribution or a regular donation.

Please see our website or contact a HEAL office for details of this easy way to contribute and improve the lives of 1000's of children.

### To help with existing projects

- Sponsor a child - transform the life of an Indian child for just £12.50 or US\$25 per month
- Make a donation
- Remember us in your will
- Become a volunteer in India
- Take part in Cycle India. (Please see our website [www.heal.co.uk](http://www.heal.co.uk) or contact a HEAL office for details of this simple method of contributing)
